

LIGHT PAPER

Eva

DESCRIPTION

Eva is a ride-sharing application based on blockchain. It aims to remove traditional ride-sharing companies that are aggregating mobility economy. Eva's principles are **life**, **liberty**, and **localization**.

- 1 Local cooperatives for legal, security, and marketing matters
- 2 Decentralized application with immutable technology for global scalability

ECOSYSTEM

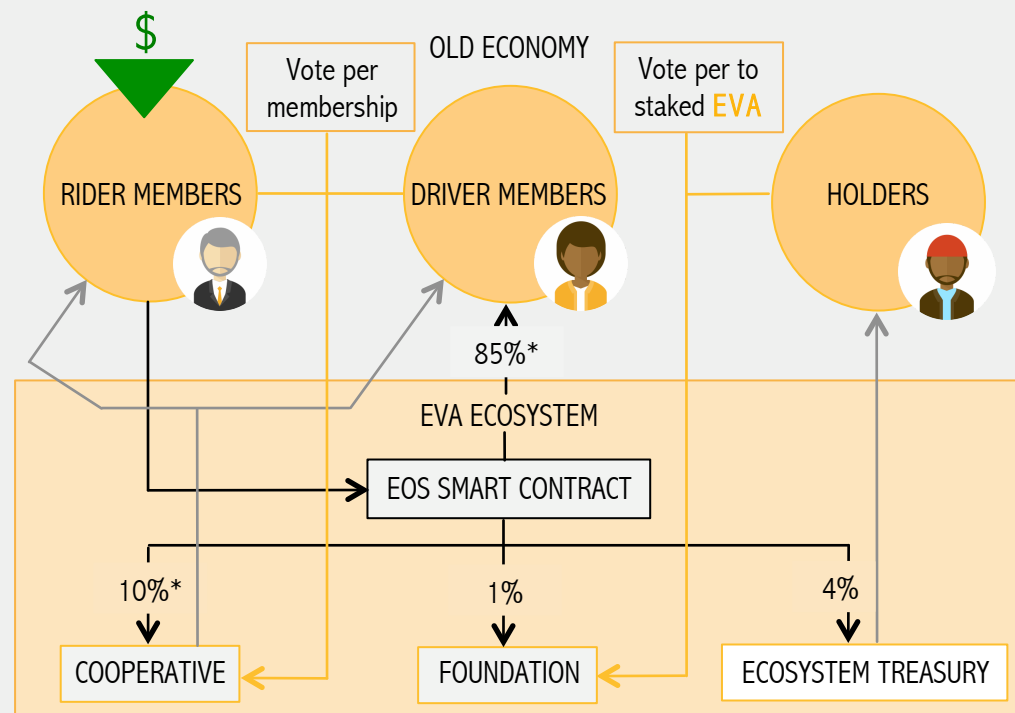

TOKEN SALE

	PRE-TOKEN SALE	FIRST ITO*	SECOND ITO*	THIRD ITO*
TIME	Q4 2018	Q1 2019	Q4 2019	Q4 2020
EMISSION	5%	28.33%	28.33%	28.34%
TOKEN PRICE	\$0.25	\$1.00	\$1.00*	\$1.00*
AVAILABLE TOKENS	2,000,000	11,333,333	11,333,333	11,333,334
VALUATION GOAL	\$500,000.00	\$11,330,000.00	\$11,330,000.00	\$11,340,000.00

*Initial token offering

*The price of the second and third token offering are subject to change and will be based on the prior 30 days running average of **EVA** with a minimum sell point of \$1.00

ECOSYSTEM MODEL

*Variable

VISION

From each ride within the ecosystem, 4% is shared among staked **EVA**. In total 40,000,000 **EVA** – which are tradable utility tokens – will be distributed. Rider and driver members share the yearly profit of their local multi-stakeholder cooperative.
